PROFESSIONAL SUMMARY

Computer Engineering graduate with a foundation in networking, system infrastructure, and cybersecurity fundamentals. Recently completed Certified IT Infrastructure Cyber SOC Analyst (CICSA/CSA) training, gaining hands-on experience in security monitoring, log analysis, threat detection, and the incident response lifecycle. Skilled in interpreting security alerts, identifying potential threats, and supporting core SOC operations. Eager to begin a career in cybersecurity in an entry-level role, contributing to organizational security through vigilance, accuracy, and continuous learning in a fast-paced environment.

TECHNICAL SKILLS

- **Operating Systems:** Linux (Kali, Ubuntu), Windows (CLI, PowerShell), Windows Server 2019
- **Security Operations:** SIEM Log Management (Splunk, Wazuh), Alert Triage & Escalation, Incident Detection
- **Network Security:** Traffic Analysis (Wireshark), Protocol Analysis (TCP/IP, DNS, HTTP), Network Discovery (Nmap)
- **Systems Administration:** Windows Event Log Analysis, Linux CLI, User Access Monitoring
- **Frameworks:** MITRE ATT&CK Mapping, NIST Incident Response Lifecycle, OWASP Top 10 (Defensive Overview)
- **Automation & Querying:** Basic Scripting (Python, Bash), SQL for Data Retrieval
- **Core Skills:** Analytical Thinking, Problem Solving, Adaptability, Communication

CYBERSECURITY PROJECTS

Wazuh SIEM Setup & Security Monitoring Implementation

- Installed and configured Wazuh SIEM for centralized log collection and security monitoring.
- Integrated endpoints to gather system, application, and security logs for analysis.
- Created alerts, rules, and dashboards to detect and respond to suspicious activity in real time, including basic SOC use cases such as intrusion detection and log correlation.

Splunk Enterprise Setup & Log Monitoring Implementation

- Installed and configured Splunk Enterprise to collect and analyze logs from multiple system, network, and application sources.
- Enabled centralized log monitoring with dashboards, reports, and alerts for real-time security visibility.
- Demonstrated core SIEM capabilities for detecting anomalies and supporting incident identification.

Web Application Security Testing (XSS, SQL Injection & CSRF)

- Performed manual security testing on a web application to identify common vulnerabilities, including XSS, SQL Injection, and CSRF.
- Analyzed and verified security issues using payload testing and request manipulation in a controlled environment.
- Documented findings with clear explanations and recommended fixes to improve application security.

CERTIFICATIONS

Certified SOC Analyst (CSA)

EC-Council

Certified Incident & Cybersecurity Analyst (CICSA)

Red Team Hacker Academy

EDUCATION

Diploma in Computer Engineering

St. Mary's Institute of Technology and Science, Palakkad

2022 – 2025

Kerala, India
